

CET333-Product Demonstration

Published

Assign to

Edit

Your demonstration should be submitted in a single file and must be no longer than 10 minutes in length

You are required to produce a working solution and demonstrate this to your client. This demonstration will be done via a pre-recorded video, which shows the functionality of the solution you have created. Your solution must:

- 1. Conform to the agreed requirements.
- 2. Be functional and largely error-free.

You should carefully plan your demonstration before you begin recording it to ensure that you fully demonstrate how you have met each requirement.

Submitting through an incorrect submission link will result in earning **zero** marks.

You will only be graded on the functionality you demonstrate in the video.
